KR12SL

The Blaupunkt KR12SL kitchen radio is a proposal for everyone who likes to listen to interesting radio programs or good music during kitchen work. The KR12SL model is equipped with an FM tuner with digital PLL synthesis and 20 radio stations. The automatic tuning and saving of available radio stations makes the radio tuning process very easy and does not take much time. When preparing food, a very useful function will be the clock with the buzzer or radio alarm function, as well as the dual timer for baking or cooking. Now, we no longer have to worry that the chicken will be undercooked and the pasta will overcook into a sticky mush. Large, clearly visible LCD display with automatic dimming in hours. 23.00-4.59 and the delicate LED backlight blend in perfectly with the casing in a classic, silver color, which means that the radio will match both the modern kitchen interior and the stylish family kitchen. Model KR12SL can be placed on the countertop, which allows folding legs mounted in the housing, and also mounted under the kitchen cabinet, thanks to the included mounting kit. To maintain the device settings, e.g. during a power outage, two AA batteries are sufficient. The KR12SL kitchen radio is the perfect companion during breakfast, cooking lunches or serving dinner. Thanks to it, time spent in the kitchen will certainly pass more pleasantly than before.

Spezifikation
